QUICK FACTS

- ✓ CGPA: 3.05 / 4.0
- ✓ BS CS — Graduating June, 2026
- ✓ FYP: Event Sphere App
- ✓ 30+ Test Cases Written
- ✓ 3 Projects Deployed
- ✓ Model on HuggingFace

SEEKING: QA ENGINEER INTERNSHIP • Manual Testing • API Testing • Mobile App Testing

OBJECTIVE

Final-year Computer Science student with hands-on QA experience gained through an industry-scale Final Year Project. Designed and executed 30+ structured test cases across functional, integration, performance, and usability testing for a Flutter/Firebase mobile application. Familiar with manual testing, API testing via Postman, and bug reporting. Seeking a QA Engineer internship to apply and grow these skills in a professional software team.

QA & TESTING SKILLS

Testing Types	Manual Testing, Functional Testing, Integration Testing, System Testing, UAT, Performance Testing, Regression Testing
API Testing	Postman (REST API testing for Supabase & Google Maps endpoints)
Test Tools	Firebase Emulator Suite, Android Studio, Git/GitHub, Excel (test case documentation)
Test Concepts	Test Plans, Test Cases, Bug Reporting, SDLC, STLC, Requirement Traceability, Black-Box Testing
Dev Stack	Flutter (Dart), Firebase (Auth, Firestore, FCM, Storage), Supabase, Python, JavaScript
Languages	Python, JavaScript, Dart, C++, Java, HTML/CSS
Other Tools	Figma, Android Emulator (API 34), Git, VS Code

QA EXPERIENCE — FINAL YEAR PROJECT

Event Sphere — QA & Testing (FYP)

Sep 2024 – Jun 2026

Flutter • Firebase • Supabase • Postman • Firebase Emulator

Team: Mashhad Jamal, Muneeb Tahir, M Noman Zafar | Supervisor: Ahmad Farid, COMSATS University Sahiwal

- ▶ Designed and executed 30+ structured test cases spanning Authentication, Event Management, Student Registration, QR Code Attendance, Notifications, Expense Management, Admin Dashboard, and Performance modules.
- ▶ Conducted Unit, Integration, System, Performance, and Usability (UAT) testing following Agile sprint cycles, catching and resolving defects at each increment before merging modules.
- ▶ Performed API testing using Postman for all Supabase REST endpoints and Google Maps API integration, validating request/response formats, authentication headers, and error handling.
- ▶ Used Firebase Emulator Suite for offline unit and integration tests, isolating backend logic from live services to ensure repeatable, environment-independent test results.
- ▶ Tested on 3 real Android devices (Samsung Galaxy A52, Xiaomi Redmi Note 10, Samsung A21s) + Android Studio emulator for compatibility and UI responsiveness across screen sizes.

- ▶ Measured and validated all performance NFRs: Event registration < 2s (achieved 1.4s), QR scan < 3s (achieved 2.1s), 500 concurrent users with no crashes, report generation < 10s (achieved 6.7s).
- ▶ Documented edge cases and defects: QR scanner degradation under low-light, duplicate check-in prevention, invalid QR rejection, network interruption graceful handling, and race condition prevention via Firestore atomic transactions.
- ▶ Conducted usability testing with representative students and faculty; achieved a 4.5/5 UI clarity rating and confirmed 100% task completion for event creation without guidance.

OTHER PROJECTS

Summarization ML Model — DistilBART Fine-tuning

Sep 2024

[Python](#) • [HuggingFace Transformers](#) • [NLP](#)

- ▶ Fine-tuned distilbart-cnn-12-6 on a custom labeled dataset; evaluated model quality using ROUGE metrics (ROUGE-1: 0.27, ROUGE-2: 0.036, ROUGE-L: 0.16) to validate summarization performance.
- ▶ Demonstrates ability to define success criteria and measure outputs against benchmarks — directly transferable to QA metric tracking.

Buy & Sell Web Platform

Oct – Nov 2024

[HTML](#) • [CSS](#) • [JavaScript](#) • [jQuery](#) • [Supabase](#)

- ▶ Tested all authentication flows (login, signup, duplicate account prevention), product upload, search/filter functionality, and cross-device responsive layout across mobile and desktop browsers.
- ▶ Used browser DevTools for DOM inspection and network request monitoring during manual testing sessions.

EDUCATION

BS Computer Science

Sep 2022 – Jun 2026

[COMSATS University Islamabad, Sahiwal Campus](#) **CGPA: 3.07 / 4.0**

Relevant: Software Engineering • Database Systems • Computer Networks • Mobile App Development • Machine Learning • Data Structures • OOP (C++, Java)
